

Apparo Fast Edit License Description

Apparo Fast Edit for IBM Cognos Analytics

Apparo Fast Edit Stand-Alone

Apparo Fast Edit for Qlik Sense

Apparo Fast Edit Micro License

General definitions

A **Business Case** can be a web form or import module.

A **named user** is a user with a unique name.

A named user that is using Apparo need a license for 1 user.

This license is connected to this user for 14 days.

After 14 days of no login this license is again moved to the pool of free licenses.

A **Apparo Designer user** license is necessary if a user want to use the Apparo Designer and using all Business Cases.

A **Apparo Designer role** is the additional right for a normal named user for using the Apparo Designer too.

Environment: A Apparo installation is for an environment.

That can be a production environment, development or test environment.

All **non-production** environments are in the license **included**.

That means it is possible to have 1 production environment and many non-production environments using 1 Basis license.

Cluster: A cluster means that many application servers of 1 environment are installed parallel and are using the same web server or load balancer. All application servers must use the same Apparo repository.

Apparo Fast Edit for IBM Cognos Analytics

Basis

- 10 x named users
- 1 x Business Case Designer role
- Unlimited number of Business Cases
- Installation support included
- Clustering not included
- Web server and application server are installed on one host together
- License necessary for each IBM Cognos BI content store
- All non-production systems are in this license included

Cluster feature

Clustering or distributed architecture and load balancing for

- better performance/higher availability using a distributed installation architecture:
 - web server and application server are installed on different hosts
 - using many application servers parallel
 - all application servers are using the same Apparo repository

For a cluster environment the “Basis” (once) and “Cluster feature” (once) must be combined.

Additional users

10 named user package

Additional designer user

1 designer user

Support & service for 1 year

- installation and E-Mail support
