Apparo Fast Edit

Version 3.2.2.0 comparing with version 3.2.0.0

What is new?

- **Additional settings for data history**

  (history in the future, changing date-to manually)

- **Variables: calculation can be done optional once only**

  (Advantage: improving performance)

- **Languages: number/date format can be different than the usual format of this language**

  (Example: Business Case language is german, data format in english)

- **Better support of browsers Google Chrome/MS Edge**

  - disabling „autocomplete" feature

  - „paste as plain text" into rich text editor

- **Automatic data refresh for a Business Case: refreshing if there are data changes only**

  Helpful for creating dashboards in Cognos using Business Cases

APPARO® Group

- **Cell update trigger with parallel execution**

  (User is e.g. updating planning values and in background the database values are recalculated automatically)

- **New source databases: Snowflake, Derby (internal database)**

- **Executing database anonymous blocks instead of calling database procedure**

  (Advantage: no own database procedures must be installed any more)

- **Optional XSS filter**

  (User data entry is automatically scanned for Javascript commands, removing Javascript commands)

- **Training movies are now locally installed**

  (no youtube access necessary any more)
