Data Protection & Privacy Statement (DSGVO/GDPR)

Apparo Fast Edit and ExcelHub is a software product that allows users to create web-based data entry applications. It is the responsibility of the designers to create data protection compliant applications.

For the operation of the software it is necessary to store the access of users for licensing reasons. These login names are stored encrypted in the Apparo Repository and are automatically deleted after 14 days.

In addition, a general system log is used. This log contains the login name.
It is the responsibility of the system administration to delete this regularly.

The Apparo has no access of any kind to collected data or data that is generated during operation.
