

Apparo Fast Edit

Version 3.2.2

Apparo & Tablets

Best practice

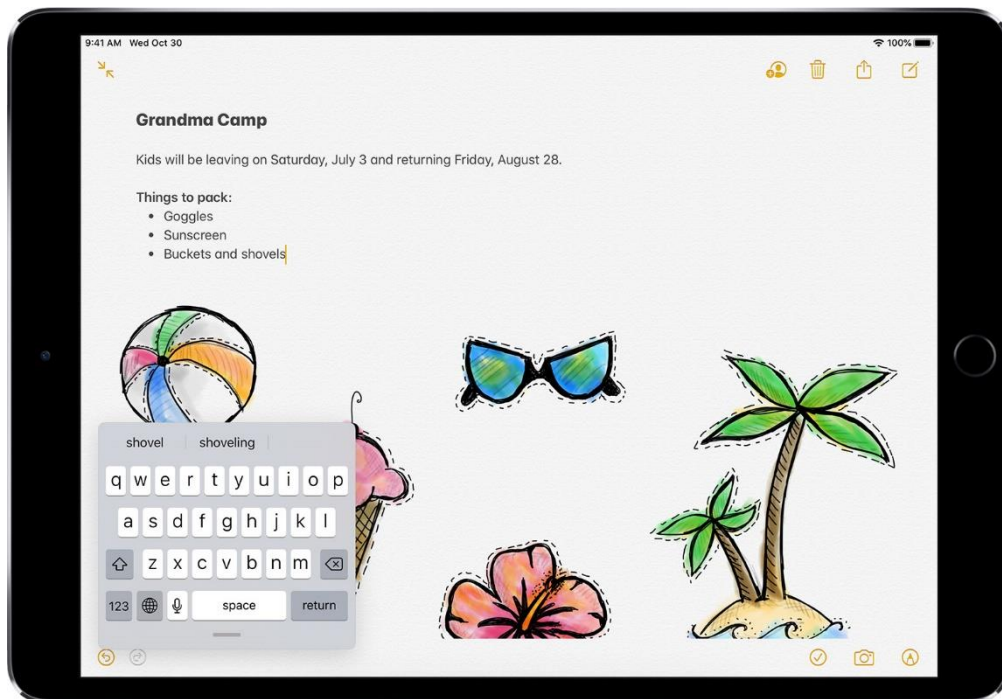

1	<i>The virtual keyboard needs space. Therefore it is helpful to use tablets with 10" and more screen size</i>	3
2	<i>Make your virtual keyboard smaller: Use two fingers to pinch the keyboard inwards to make it smaller.</i>	3
3	<i>Use lookup widgets without the feature of entering by keyboard: saving screen space, no keyboard necessary</i>	3
4	<i>Some tablets can use hardware keyboards too. Advantage: More space left for the application</i>	3
5	<i>Use Business Cases that are not displaying many data rows, making it easy for the user, increase text size and gaps</i>	3
6	<i>Use text area widgets without rich text feature: making it easy for the user</i>	3
7	<i>Do not use Excel export and import feature</i>	3
Support		4

- 1 **The virtual keyboard needs space. Therefore it is helpful to use tablets with 10" and more screen size**

The small Ipad mini is just too small for entering text because of the keyboard space.

- 2 **Make your virtual keyboard smaller: Use two fingers to pinch the keyboard inwards to make it smaller.**

- 3 **Use lookup widgets without the feature of entering by keyboard: saving screen space, no keyboard necessary**
- 4 **Some tablets can use hardware keyboards too. Advantage: More space left for the application**
- 5 **Use Business Cases that are not displaying many data rows, making it easy for the user, increase text size and gaps**
- 6 **Use text area widgets without rich text feature: making it easy for the user**
- 7 **Do not use Excel export and import feature**
